Profili strutturali / Structural profiles

La vasta gamma di profili strutturali standardizzati permette di ottimizzare i tempi di progettazione e costruzione delle applicazioni contribuendo a renderle più funzionali ed esteticamente più gradevoli. La produzione di serie garantisce qualità, precisione e costanza di lavorazione. La costruzione con il sistema dei profili strutturali non richiede l'impiego di saldatura e verniciatura. Le realizzazioni possono essere facilmente modificate recuperando il materiale impiegato.

The wide range of standard structural profiles allows to optimize the time of design and construction permitting them to become more functional and aesthetically pleasant. Mass production guarantees quality, precision and constancy of work. Welding and painting are not required during the construction with the structural profile system. All the constructions can be easily modified thanks to the possibility of reutilizing the unused material.

Formule utili / Useful formulas

$$\sigma = \frac{F \times L}{W} \leq K \quad f = \frac{F \times L^3}{E \times I \times 3}$$

$$\sigma = \frac{F \times L}{8 \times W} \leq K \quad f = \frac{F \times L^3}{E \times I \times 192} < K$$

$$\sigma = \frac{F \times L}{4 \times W} \leq K \quad f = \frac{F \times L^3}{E \times I \times 48}$$
